READ CAREFULLY

TERMS OF SALE

1. Auction sales ARE NOT approval sales. Read these terms carefully. By submitting bids you agree to the terms set forth below. All coins have been classified by experts and while errors will be gladly corrected NO LOT MAY BE RETURNED WITHOUT WRITTEN PERMISSION. Request to return coins MUST BE MADE WITHIN THREE DAYS OF RECEIPT OF COINS.

2. All bids are to be by LOT as numbered in the catalogue. When identical bids are received, preference is given to earliest bidder.

3. This is a PUBLIC AUCTION. All bids are entered as received and highest bidder will be the buyer. Mail bidders may feel free to submit any bid they wish and each lot will be purchased for such bidders at the next highest bid over room bidders.

4. Bidders must establish credit or have on deposit 25% of TOTAL bids.

5. Lots will be available to room bidders after each session, except large heavy lots or books. Books will be sent directly from the home of the consigner. (George L. Lee Jr.)

6. Mail bidders will receive their lots promptly after the end of the sale. All ACCOUNTS MUST BE SETTLED PROMPTLY IN U.S. FUNDS, or in other currencies if special arrangements have been made.

7. Lots delivered in New York City are subject to 3% Sales Tax.

8. There will be no charge for executing bids but postage and insurance will be added, and a handling charge for heavy lots and books.

9. Where estimates are given they represent either the owner's idea of value or our professional opinion as to what they should bring. IN ANY EVENT THEY ARE ONLY ESTIMATES AND YOU CAN BID HIGHER OR LOWER. We recommend however, if you want the lot, bid close to or over estimate.

CABLE ADDRESS "NUMATICS, NEW YORK CITY, U. S. A."

10. All coins are genuine and as described.

THE ROMAN EGYPTIAN AND GENERAL MINOR COINS

Lots 1–1025C

SALE OF

TETRADRACHMS OF ROMAN EGYPT

from the collection of

Col. James W. Curtis

An important tribute to Greek & Roman Numismatics.

The Alexandrian tetradrachms listed in this sale are from the extensive private collection formed by Col. Curtis which served as the basis for the standard reference work THE TETRADRACHMS OF ROMAN EGYPT. All coins listed appear in the catalogue section of that book, and carry the appropriate "Curtis" number. Those bidders interested in full detailed descriptions may consult that work.

In the period of more than two years that have elapsed since Col. Curtis developed "catalogue prices" for the Alexandrian series, these coins have appreciated in price, as have all series. In general, the coins of Roman Egypt are now selling at a price increase of about 35% over those shown in THE TETRADRACHMS OF ROMAN EGYPT. This price increase has been included in the estimates of value of each lot listed in this sale. However, no attempt has been made to give inflated or fictitious values to stimulate high bidding — rather, the estimated values listed here attempt to reflect as accurately as possible the current market, so that this catalogue will serve as a reference guide. Under these conditions, bidders should consider the estimated values as the correct price for any lots in which they are seriously interested, and bid even over them.

The condition of each coin is stated as AU for unusually choice pieces showing no evidence of wear, as XF for extremely fine pieces, as VF for very fine, as F for those in fine condition, as VG for very good, and as G for good. Unlike modern coins, many ancient coins show more wear on one side than on the other. Where such an appreciable difference exists, the condition of both sides will be shown in the following manner: F/VF. Due to the very high relief of many of these coins, wear may be uneven. In such cases, the condition may be listed as VF plus, VG plus, etc. Coins that are fine, except for some minor defect will usually be described as AF (about fine).

Some of the greatest known rarities of the Roman Egyptian series appear in this sale, along with dozens of tetradrachm that were unpublished prior to Col. Curtis' recent book. In many instances, this sale will provide a "once in a lifetime" opportunity to acquire such pieces. At the same time, an abundance of common and relatively inexpensive types will make it possible for many collectors to build from this sale an extensive and fascinating group of types at little expense.

For lots 1–270 we are giving herewith the comparative numbers in the British Museum catalogue (BMC) because only the Curtis number is mentioned. From lot 270 on the cataloguer has listed both references. Curtis and BMC. Milne numbers are occasionally mentioned. We now quote the lot number in our catalogue and the B(ritish Museum) number.

Lots 1026–1890

THE GEORGE LEE JR. COLLECTION OF CROWNS OF THE WORLD

PART III.

Countries beginning with the letters N–Z

Foreign sets and multiple crowns

and some minor silver coins

About valuations:

Please note that to keep in line with changing prices we have done our best to put the actual price next to the crowns in the Lee collection and not what the coins really are worth or **should bring.** These valuations have been compared to the large taler collection sold in Lucerne by Bank Leu & Adolph Hess in 1957 (The H. D. Gibbs collection) and the actual prices realized have been used in estimates for the Lee collection. In instances where we did not find a record we have used Lee's cost price. Please bear in mind that Lee's coins were mostly bought at a time that prices for crowns were not as high as at present.

In bidding we suggest you stay as close to our estimates as possible if you really do want to obtain the coins. We will save you on your bids wherever it is possible.

AMERICAN COLONIAL

(GOLD "PIRATE MONEY")

The Spanish gold "piece of eight", so often captured from the Spanish ships by the pirates roaming off the Florida coast and in the Caribbean (therefore called often "pirate money") was in fact a legalized coin of $16 in the U.S.A. as late as 1840. Just as the Spanish milled dollar, these gold coins belong to the U.S. series.

ANTIQUE MAPS vs. TIME & SPACE

(A Numismatic Association of Merit)

In the light of man's initial step towards **outer space,** the eternal mystery of infinity again demands general consideration; the early explorations of the earth's two dimensional surface, so curiously recorded in old maps, now become a collector's inspiration, closely associated to his study of numismatics.

As a spring-board to the three dimensional universe such crude earthly records actually become significant relics of perpetual value and charm.

COLLECTOR'S ITEMS; an important salvage; genuine maps of the **17th Century,** beautifully engraved and hand colored by the renowned BLEAU family and other cartographers of the period; a choice selection from an important collection.

(The normal deteriation of old paper is rapidly creating rarity in the old chart department; it follows that an investment in such historical material serves a dual purpose.)

TOGETHER WITH A UNIQUE IDEA in the **mounting** for better preservation and aid to study. Modern DURABLE materials make the assembly flat, decorative and otherwise useful.

They provide an atmosphere of fixed tranquillity in your library or den, in this world of terrific change.

GEOPHYSICS has received an enormous stimulus. The technology of this century makes venture into outer space a new point of beginning, as time and space merge to eternity.

It is the intention here to provide a necessary service, ancillary to our periodic auction sales, same to be repeated if desired. We find ousselves in an excellent position in the heart of New York City, **to find and salvage interesting thins** as such comes to market.
